

OUR CARS

Ford Fiesta

Our Ford Fiesta School Cars are the perfect platform to learn the fundamentals of car control and rally driving. Very close to a stock production vehicle, we've added rollover protection and Schroth four-point seat belts, upgraded the suspension to Bilstein Heavy Duty units, and added Hawk Performance brake pads.

Audi Quattro

The Audi Quattro Rally Cars started the All Wheel Drive rally revolution, and it's therefore where you'll start your AWD skid control and rally training. With five cylinder engines and locked differentials in the center and rear, you'll have a blast sliding these cars around corners and mastering the art of the Scandinavian Flick!

Subaru Impreza

Subaru Imprezas are one of the most popular and versatile rally cars worldwide. We've outfitted ours with full rollcages and safety equipment, upgraded suspension and brakes, underbody protection, and other essentials that ensure reliable fun for years to come.

BMW 325i

The BMW 325i is the perfect platform to learn Rear Wheel Drive rally skills. With full rollcages and safety equipment, powerful six cylinder engines and limited slip differentials, our BMWs are awesome rear wheel spinning gravel machines!

Ford Fiesta ST

The Ford Fiesta ST is a lightweight, powerful, turbocharged Front Wheel Drive car. True monsters here on our technical course roads, these cars are used on day 4 and 5 of our courses to give you the feel and experience of driving at the limit. Full rollcages and safety equipment of course.

Subaru Impreza WRX

The Subaru Impreza WRX is a rallying legend, and we've been expanding our fleet here at the Rally School. These cars again have full rollcages and safety equipment, rally racing suspension, and Hawk Performance brake pads amongst other modifications. If you're looking for quality turbocharged AWD rally experience, look no further.
